LinkedIn | Portfolio

Core Skills

Multiplayer Architecture
Deterministic Game Logic
Systems Architecture
Gameplay Systems
AI Heuristics
Real-Time Synchronization
Performance Optimization
Custom Editor Tooling

Languages

C#
C++
JavaScript
Python
HTML
CSS

Tools

Unity
Unreal
Photon (PUN)
ScriptableObjects
JSON Serialization
DOTS
HDRP
URP
AR/VR/XR (Meta Quest)
WebGL
iOS/Android
Windows Desktop
Git
Jira

Certification

Unity Certified: Professional Programmer
Certification

Professional Summary

Senior Unity Engineer and Technical Lead with 16 years of experience specializing in scalable multiplayer and gameplay systems for high performance PC, mobile, and XR applications. Proven technical leader delivering production-ready titles through strong architectural direction and maintainable system design.

Professional Experience

DCGO — Milford, OH

Lead Developer — Aug 2024 - Present

- Led a fully remote team of 10+ developers using Jira and Git, resulting in on-time releases for every patch and milestone.
- Engineered a modular card effect game system using Scriptable Objects, reducing new content implementation time by 40%; Allowing designers to implement new content for testing and deployment resulting in a smoother live deployment.
- Architected a deterministic rules engine with stack/priority resolution, triggered effects, and phase-based state machine to automate complex card interactions and eliminate illegal game actions.
- Designed custom Unity C# editor tools to accelerate card creation and reduce data testing iteration time by 80%.
- Optimized Unity runtime performance using profiler tools, improving efficiency, stability, and player experience by 60%.

Kaleidoscope Innovations — Blue Ash, OH

Technical Lead | Senior Software Developer — Jul 2019 - Jan 2026

- Led Unity engineering team through 10+ shipped titles from concept to completion across PC, XR, Mobile platforms; heavily emphasizing gamification.
- Managed Jira and Git workflows to improve feature releases and code reviews, resulting in improved code quality by 80%.
- Partnered directly with executive stakeholders and cross-functional teams to translate high-level vision into scalable Unity systems, building long-term trust and delivering production-ready solutions for Fortune 500 clients including Canon and Philips.
- Designed procedural level generation and content pipeline workflows, increasing content iteration time and variation by 60%.
- Spearheaded a mentorship program focused on debugging practices, Unity tooling, and performance profiling, improving debugging efficiency across the team by 60% and accelerating issue resolution across the department.

Education

Art Institute of Ohio – Cincinnati , Mason, OH
Associate of Science (AS) — Interactive Media Design
Aug 2007 - Dec 2009

Groups & Hobbies

IGDA
Forever DM
Trading Card Games
Yu-Gi-Oh Tournament Judge
Video Game Club President

Designing Digitally Inc. — Franklin, OH

Lead Programmer | Interactive Media Programmer — Aug 2009 - Jul 2019

- Delivered 10+ cross-platform titles for desktop, mobile, WebGL, and VR/AR/XR, resulting in a broader market reach.
- Designed and implemented gamification systems—including progression loops, rewards, achievements, and branching dialogue—to increase engagement and reinforce learning outcomes across interactive titles.
- Architected and developed a real-time multiplayer RPG platform using Photon, supporting 200+ concurrent users.
- Engineered AI-driven NPC systems and branching dialogue frameworks, increasing user engagement by 30%.
- Partnered with designers, artists, stakeholders, and product managers to translate creative vision into gameplay mechanics, using Unity and Git to implement features that improved player satisfaction and met project milestones.
